AUTHOR INDEX

Bartoli, C. & Berry, W.	Review of European Electric Propulsion Developments	147
Beichman, Charles A.	The Universe at Infrared Wavelengths	23
Barstow, M.A. & Willingale, R.	The ROSAT Wide Field Camera XUV Telescope	345
Benson, R.D. & Chester, T.J.	IRAS Post-Mission Analysis at IPAC	363
Bowyer, S., Malina, R.F. & Marshall, H.L.	The Extreme Ultraviolet Explorer Mission: Instrumentation and Science Goals	357
Branegan, J.	Simple Analysis of Space Station Downlinks	135
Carper, R.D.	Flight and Ground Packet Telemetry Systems Activities at NASA's Goddard Space Flight Center	325
Clark, Phillip S.	The First Missions of the Soviet Medium Lift Launch Vehicle	117
D'Abreu, A.	Satellite Television Broadcasting – Direct to the Home	441
Davies, P.E. & Burrows, C.J.	The Hipparcos Main Mission Accuracy Simulation	435
Dean, A.J.	Future Space Missions in Gamma-ray Astronomy	373
Fearn, D.G.	Factors Influencing Integration of UK–10 Ion Thruster System with a Spacecraft	199
Fielder, J. & Leggett, Nickolaus	A Second Generation Lunar Agricultural System	263
FitzGibbon, J.	Hipparcos Dedicated Control System	469
Flower, R.J.	Giotto Spacecraft Health Assessment	247
Fogg, M.J.	The Feasibility of Intergalactic Colonization and its Relevance to SETI	491
Forster, B.	An Overview of Remote Sensing Activities in Australia	581

Garner, J.T. & Jones, M.	Developing Satellite Pre-Launch Operations	241
Geller, Marvin	Looking at the Earth from Space	95
Goodall, G.V. & Simpson, D.M.	The Thermal Design of the Wide Field Camera on Rontgensatellit	275
Green, S.F., Clarke, C.D. & Stevenson, T.J.	A 2MV Van de Graaff Accelerator for Cosmic Dust Impact Simulation	393
Green, S.F. & Perry, C.H.	Observations and Modelling of Cometary Dust	421
Greenhill, J.	Space Science in Australia	559
Groh, K.H., Loeb, H.W. Mueller, J., Schmidt, W. & Schuetz, B.	RIT–35 Ion Thruster – Design and Performance	209
Hall, Rex	The Soviet Cosmonaut Team 1956–1967	107
Hall, Rex	The Soviet Cosmonaut Team 1978–1987	111
Harris, A.W.	The Quick-look Facility for the XUV Wide Field Camera on ROSAT	353
Harvey, B.	The Evolution of the Prognoz Series of Solar Observations	131
Harwit, Martin O.	The Promise of Astrophysical Observation Conducted from Space	17
Held, K.	New Generation of Telemetry Systems Using CCSDS Packetisation: A Prototype Implementation	311
Hill, D.C.	Laser Simulation of Micrometeoroid Impacts	397
Hope, W.	The First & Second Generation AUSSAT Systems	587
Howes, S.	Use of Satellite and Radar Images in Operational Precipitation Nowcasting	455
Irving, M. & Lee, J.	Columbus On-Board Software	483
James, M.	Into Space From Down Under – The Early Years	539
Jones, M. & Head, N.	The Standardisation of On-Board Data Management Systems and Its Impact on Ground Systems	295
Kammash, T. & Galbraith, D.L.	A Promising Fusion Approach to Advanced Space Propulsion	527
Klingsheim, K., Flaten, B.E., Kampenhoy E. & Johannessen J.S.	GAAS Technology for Digital Space Applications	301
Krimigis, S.M.	The Sun and the Sun-Earth Connection	63
Kurtz, H.L., Auweter-Kurtz, M, Merke, W & Schrade, H.O.	Experimental MPD Thruster Investigations	223
Lebon, B.A.	An International Space Telpher System (ISTS) using an Earth Grain Ring	509
Leeson, H.C.	Cost Modelling for Space Programmes: The Columbus Polar Platform	477
Lewis, J.	Ground Segment Support for the Eureca-AI Mission	462
Martin, A.R., Bond, A. Lavender, K.E., Harvey, M.S. & Latham, P.M.	A UK Large Diameter Thruster for Primary Propulsion	167
Martin, A.R., Harvey, M.S. & Latham, P.M.	Performance Assessment of a UK Rare Gas Ion Thruster	183
Martin, A.R., Bond, A. & Lavender, K.E.	Plans for In-orbit Test of UK Rare Gas Ion Thruster	193
Martin, A.R. & Cresdee M.T.	The Use of Electric Propulsion on Low-Earth Orbit Spacecraft	175
Matloff, G.L. & Parks, L.K.	Interstellar Gravity Assist Propulsion: A Correction and new Application	519
McDonnell, J.A.M.	Extraterrestrial Particulates: Their role in Space Science	387
Middleton, B.	A Policy for Space Industry Development	555
Mills, P.	The Soviet Manned Lunar Programme and Soyuz Missions 1–5	125
Milnes, M.D.	Interpretation of Remotely Sensed Images Using Historic Data	451
Miner, Ellis D. & Stone, Edward D.	Voyager at Uranus	49
Morrison, David	The Exploration of the Solar System	41
O'Dell, C.R.	The Promise of the Hubble Space Telescope	35
Paccani, G.	Coaxial Non-steady Solid Propellant MPD Thruster Experimental Analysis	233
Pankiewicz, G.S., Perry, C.H. & Nappo, S.	The Giotto Halley Encounter: Dust Impact Analysis at Kent	411
Panzieri, F. & Lissoni, C.	Data Communication Software for On-board Applications	289
Papagiannis, M.D.	Bioastronomy – The Next Steps. A Report on IAU Colloquium 99	534
Parks, G.K., Shawhan, Stanley, Calabrese, Michael A. & Alexander, Joseph	The Global Geospace Science Programme	81
Pike, G.	Cape York International Spaceport	599
Powell, Joel W.	Nauka Modules	141
Pye, J.P.	The Ground System for the XUV Wide Field Camera on ROSAT	337
Quigley, D.	Satellite Control and Operation System	445
Robertson, J.G.	Two Hundred Years of Astronomy in Australia	567
Rosendhal, Jeffrey D.	Space Science at NASA: Retrospect & Prospect	3
Schaetzel, S.	The Australian Science & Application Spacecraft – A Way to Space Qualification	607
Schrade, H.O., Auweter-Kurtz, M. & Kurtz, H.L.	Cathode Phenomena in Plasma Thrusters	215
Schultz, F.W.	The Effects of Investment in Extraterrestrial Resources and Manufacturing on the Limits to Growth	497
Shelford, C.J.	Data Management for Large Space Systems	307
Sitarama Raju, D, Sreehari Rao, Ch. & Shrivastava, S.K.	Short Arc Orbit Determination Using Interferometer Phase Angle Rate Data for Low-Earth Orbits	269
Stalker, R.J.	Hypervelocity Aerodynamics in Australia	611
Stapinski, E.	The Development of a Space Capability within Australian Industry	619
Steinert, M.	Fault Tolerant On-board Computers	329
Stevenson, T.J.	EURECA TICCE: A Nine Month Survey of Cosmic Dust and Space Debris at 500 km Altitude	429

Swales, A.W.	Heavy Lift Horizontal Take-off and Landing Vehicles	255
Van Allen, James A.	Early Days of Space Science	11
Wadner, P.J. & Fagg, B.L.	TTC Subsystem for the Olympus Spacecraft	319
Zarnecki, J.C.	Giotto Dust Impact Detection System: Instrument and In-flight Performance	403
Zigoy, E.A.	Soviet Apt Meteor Activity over Western North America	285
